

# Recording Workshop

*Accelerated Certificate Training in Music Recording & Audio Production*

**Recording Workshop is the leading hands-on educational choice for those seriously seeking a career in music recording and audio production.**

The training is concentrated, with the biggest emphasis being practical experience in the studio. This immersive approach lets the entire curriculum be completed in less than two months. It is time-tested and proven to be a superior way to prepare new music production professionals. It's much more affordable too.

Since 1977, students from over 70 countries have traveled to our campus to participate in the unique programs we offer.

We can teach you the skills needed to start a career as an audio recording engineer, skills that are also fundamental to start work as a record producer or live sound engineer, skills that can empower someone who wants to produce and record their own music with full creative control.

Across the country and around the world, in recording studios and on the road, Recording Workshop graduates have worked on projects for many of today's biggest music artists. And thousands of our grads are working behind the scenes on movies, television shows and in just about any situation that needs skilled audio professionals.

Our curriculum is designed to accommodate students from a wide variety of backgrounds - musicians or non-musicians, those who already own a project studio or those who have never been in a studio. Recording Workshop is ready to help anyone with a desire and dedication to learn.

## CORE PROGRAM

**5 weeks - 180 hours**

The CORE Program is the foundation for all Recording Workshop students. It is highly immersive (5 days per week, 6-9 hours per day), and sessions are offered year-round with start dates every 7 weeks. Each day is a combination of two lectures and 3-6 hours of project work in the studio. The training is extremely hands-on and creative.

## ADVANCED PROGRAM

**2 weeks - 80 hours**

The ADVANCED Program is an optional extension to the CORE training that allows students to deepen their studio skills. The ADVANCED projects put increased demands on the students' shoulders as they handle all aspects of session work. The ADVANCED Program is offered 7 times per year, and is usually taken right after the CORE Program.

**For MUCH more info on curriculum, costs, and schedule, please visit our website:**

**RecordingWorkshop.com**

**Remaining 2018 Start Dates: May 29, Jul 16, Sep 4, Oct 22**

Congrats to Recording Workshop grads Sean Kelleth and Nick Mac. Working at Perfect Sound Studios in Los Angeles, they engineered for the track Glorious on Macklemore's album The Genesis. Awards for RIAA Certified Platinum status are now in the hands of all the talent involved. Other artists that Sean has engineered for include Primal Scream, Dirty Heads & J. Cole.

Recording Workshop grad John Guentner is one of the busiest Foley mixers in the biz. The Big Bang Theory is one of about a dozen TV shows that he currently brings his talents to. Roseanne, Mom, SEAL Team, and Brockmire are a few of the others. John's Foley mixing skills will also be heard in the upcoming remake of A Star is Born with Lady Gaga and Bradley Cooper.
